

Teacher's Puddy

Items Needed:

- 2 Tablespoons of Faultless Liquid Starch
- 1 Tablespoon of white glue
- Food coloring (optional)
- Plastic Ziplock Bag
- 2 small bowls
- Paper towels

1. Measure glue into one bowl, mix in food coloring.
2. Measure starch into a separate bowl.
3. Pour glue mixture into the starch. Let glue soak into starch at least 5 minutes or more.
4. Pour glue/starch mix into the plastic bag, seal bag and knead. The more kneading (approximately 30 minutes) the better the product will turn out. If mixture is too runny, absorb excess liquid with paper towels.
5. Mixture is really slimy at first, then will become stringy. Eventually, mixture will form a putty-like ball.
