

Suncatchers

Items Needed:

Faultless Liquid Starch

Waxed paper

Colored tissue paper cut into small pieces

Books or heavy objects to use as weights

Paintbrush

1. Place sheet of waxed paper on work surface.
2. Paint a thin layer of Faultless Liquid Starch on waxed paper. It will “bead up”
3. Place a layer of tissue pieces over the starch.
4. Paint another layer of starch over the tissue.
5. Add strength or different colors by adding another layer of tissue over the first layer. Be sure to cover each layer with starch.
6. Place weights around the edges of the waxed paper to prevent the Suncatcher from curling. Dry overnight.
7. Peel Suncatcher off waxed paper. Hang in a window and enjoy the view!

Since 1887

Faultless Starch
